SUBJECT: Review of Draft Sites 4B & 10 Work Plan
Allegany Ballistics Laboratory, Rocket Center, West Virginia

Dear Mr. O'Connor:

The West Virginia Department of Environmental Protection/Division of Waste Management has reviewed the draft Work Plan Addendum for Soil and Groundwater Sampling and Well Installation at Sites 4B and 10 at the Allegany Ballistics Laboratory Superfund Site Rocket Center, West Virginia. Verbal comments were documented in the May and June 2000 Partnering Team Meetings where additional soil sampling was planned and new well locations were proposed as well as the types of analysis to be performed. Based on the changes that were incorporated in this plan, WVDEP/DWM concurs.

If there are any questions or if you require further clarification, please contact me at (304) 558-2508 or E-mail: tbass@dep.state.wv.us.

Sincerely,

Thomas L. Bass
Environmental Resource Specialist
